

# EMC Documentum HeadStart Services for ApplicationXtender

HeadStart Services for ApplicationXtender helps you quickly build and deploy document management applications

- The Big Picture**
- **Create an “electronic filing cabinet” on Windows/.NET:** Take full advantage of your Microsoft Windows environment by using EMC Documentum ApplicationXtender<sup>®</sup> to easily deploy business information to user desktops and Web locales.
  - **Rapidly deploy and administer:** Fast implementation and ease of administration makes ApplicationXtender an optimal solution for ISVs and value-added resellers looking for out-of-the-box functionality.
  - **Perform high-speed content capture and reports management:** Quickly scan, store, search, and share documents and images to automate paper-based processes, improve customer service, increase productivity, and streamline business processes.
  - **Effortlessly integrate with business applications:** Easily configure user access to document images and other business information in the ApplicationXtender repository within existing business applications; no programming required.
  - **Leverage DOD 5015.2-certified records management:** Draw on the world-class EMC Documentum records management technology, which fully and seamlessly integrates best-in-class records management and retention administration from EMC Documentum with the ApplicationXtender repository.

Efficiently capturing, storing, and managing critical documents and other business information is one key to competing in today’s fast-paced business environment. EMC Documentum ApplicationXtender enables organizations to quickly automate paper-based processes and securely archive and access electronically managed documents, files, reports, and other business-critical information.

---

Built on a central information repository, EMC Documentum ApplicationXtender is a content management solution optimized for Microsoft Windows and .NET. It provides companies with an integrated suite of document imaging, document management, computer output to laser disk (COLD) reports management, and workflow services. An out-of-the-box solution, ApplicationXtender can be used to quickly create an “electronic file cabinet” for business content.

### Services for a fast start and flawless finish

Now you can combine ApplicationXtender with EMC Documentum HeadStart Services to more rapidly deploy business solutions and promote best practices among varying line-of-business requirements. Each HeadStart Services engagement includes the following services:

- **Preparation:** Planning and installation materials are provided and reviewed via tele-conference with technical and business personnel. These materials are completed by the customer prior to the consultant’s arrival on site.
- **Installation and knowledge transfer:** The ApplicationXtender environment is installed and configured, an ApplicationXtender application is created, and SQL database, Outlook plug-in, scanning, and administration clients are configured as required. Feature, administration, and configuration knowledge are also transferred to technical support staff, and an end-user training session is conducted at this time.
- **Deployment planning:** A deployment planning session, conducted by an EMC Documentum deployment consultant or consulting principal, identifies immediate steps as well as long-range deployment activities that support stated business objectives.

### Services schedule and fees

The price for HeadStart Services for ApplicationXtender is \$13,525. The fixed price includes reasonable travel and living expenses for one on-site client visit. The scope of services is limited to those documented and agreed to in a signed Statement of Work. The estimated work effort is five business days.
